Course Description:

This course is appropriate for professionals who work in a multidisciplinary setting, with a specific focus on social workers and substance use professionals. Throughout the course, participants will explore how personal and societal morals impact professional ethics and decision making. The evolution of ethics within the social work field will be examined and compared to current ethical issues that professionals deal with daily. As many helping professionals are now working in integrated settings and hold multiple certifications, Codes of Ethics from a variety of disciplines will be reviewed. Interactive technology will be used to practice skills and encourage discussions.
